PROFESSIONAL SUMMARY

Mathematics graduate with hands-on, project-based skills in Advanced Excel, Power BI, SQL, Google Sheets and Python. Built management dashboards, KPI scorecards and MIS reports analyzing sales, customer, healthcare and hospitality data; automated recurring reports with Power Query and Google Sheets; and cleaned, validated and reconciled data from multiple sources to keep reporting accurate and consistent. Completed a 5-month Data Analyst Job Ready Bootcamp and HackerRank SQL (Basic and Intermediate) certifications. Motivated to turn raw data into clear, actionable insights that support better business decisions.

SKILLS

- **Advanced Excel:** Pivot Tables, Pivot Charts, XLOOKUP/VLOOKUP, Power Query, Power Pivot, slicers, conditional formatting, formula-based report automation
- **Power BI:** Power Query, star-schema data modeling, DAX (CALCULATE, SUMX, time intelligence), KPI cards, drill-through, bookmarks, what-if analysis, financial analysis (NPV, IRR, forecasting)
- **SQL & Databases:** MySQL, MS SQL Server, PostgreSQL, Google BigQuery, Snowflake, Supabase; joins, subqueries, CTEs, window functions, aggregations
- **BI & Automation:** Metabase dashboards; Google Sheets dashboards and macros; workflow automation with n8n (triggers, If/Switch/Merge logic, AI agent integration)
- **Analytics:** Sales, revenue and profit analysis; MoM/YoY growth, variance and seasonality; KPI tracking; customer segmentation, LTV and churn; MIS reporting
- **Data Quality:** Data cleaning, validation, accuracy and consistency checks, multi-source reconciliation, master (dimension) table design
- **Python:** Pandas, NumPy, Matplotlib for data cleaning and exploratory analysis
- **Professional:** Analytical thinking, data interpretation, presentation and communication, attention to detail

PROJECTS

Adventure Works Sales Analysis Dashboard | Power BI

github.com/Rifat250/Data-Analytics-Projects

- Built a 4-page management dashboard tracking $24.91M revenue, $10.46M profit, 25K orders, 17.4K customers and a 2.17% return rate for a bike and accessories retailer (2020–2022).
- Cleaned and combined 7 CSV files in Power Query; designed a star-schema model with two fact tables (56K+ sales, 1.8K+ returns rows) and six dimension tables.
- Created 27 DAX measures (revenue, profit, return rate, MoM change, targets) with a what-if price slider, regional map and product drill-through.

Hospital Emergency Room Analysis Dashboard | Power BI

github.com/Rifat250/hospital-emergency-room-analysis-powerbi

- Analyzed 9,216 ER patient records for patient flow, waiting time, satisfaction and demographics; tracked a 35.3-minute average wait by department.
- Identified peak demand on Mondays (1,377 visits) and at 11 PM to support staffing and resource planning, using DAX time intelligence and field parameters.

AtliQ Grands Revenue Intelligence and Optimization | SQL (MySQL)

github.com/Rifat250/atliq-grands-revenue-intelligence-sql

- Queried 134K+ booking records to analyze revenue, MoM growth, occupancy, ADR, RevPAR and cancellations across hotels in four cities using joins, CTEs and window functions (LAG, RANK).
- Flagged under-utilized hotels (~44% occupancy vs. 57.87% overall) and weekend-driven demand to inform pricing strategy.

Superstore Sales Performance and Regional Analysis | Excel

github.com/Rifat250/Superstore-Sales-Overview-EXCEL-Dashboard

- Reported $2.30M sales and $286K profit by region, state, city, category and shipping mode with Pivot Tables, Pivot Charts and slicers.
- Identified a November sales peak ($352K), Phones as the top sub-category (~$330K) and Standard Class as 60% of orders.

Customer Insights and Retention Dashboard | Excel
github.com/Rifat250/customer-insights-dashboard

- Tracked customer lifetime value, purchase frequency, churn risk, average order value and regional performance in an interactive dashboard.
- Segmented customers by region, category and retention strategy to flag high-value and at-risk segments for retention and marketing decisions.

Employee Attendance Automation System | Google Sheets
github.com/Rifat250/employee-attendance-automation-system-google-sheets

- Built an attendance entry form with XLOOKUP employee lookup and one-click submission using Google Sheets macros.
- Automated work-hour, late-minute, overtime and status calculations, feeding a KPI dashboard for management review.

CERTIFICATIONS

- **Data Analyst Job Ready Bootcamp (5 months)** | Data Solution 360 | Aug 2025
- **Data Literacy Foundations** | Maven Analytics | Nov 2025
- **SQL (Basic) Certificate** | HackerRank | Dec 2025
- **SQL (Intermediate) Certificate** | HackerRank | Dec 2025
- **Zero to Advanced SQL with BigQuery & Metabase (Live Course)** | Interactive Cares
- **Financial Analysis in Power BI** | DataCamp | Aug 2026
- **Introduction to Workflow Automation with n8n** | DataCamp | Sep 2026

EDUCATION

MSS in Development Policy and Studies | Khulna University, Bangladesh | 2018 | CGPA: 3.73 / 4.00
BSc in Mathematics | Khulna University, Bangladesh | 2015 | CGPA: 3.47 / 4.00
